	ı		
		4/32 double-stranded DNA binding	
	П	2/12 transcription regulatory region sequence-specific DNA binding	p < 1e-04
		3/20 sequence-specific double-stranded DNA binding	p < 0.001
		3/29 transcription regulatory region DNA binding	p < 0.005
		1/6 activating transcription factor binding	
		6/180 molecular transducer	
	ı	1/5 vascular endothelial growth factor-activated receptor	
	Н	3/38 endonuclease, active with either ribo- or deoxyribonucleic acids and producing 5'-phosphomonoesters	
		6/151 endonuclease	
	L	3/47 ribonuclease	
	1	1/5 steroid hydroxylase	
	ļ	5/45 monooxygenase	
	Цl	15/473 oxidoreductase	
	] l	4/77 oxidoreductase, acting on paired donors, with incorporation or reduction of molecular oxygen	
		3/10 aromatase	
	- └┤	4/70 electron transfer	
	,	8/276 cofactor binding	
	닉	4/67 tetrapyrrole binding	
		1/6 retinol dehydrogenase	
		1/6 glutathione transferase	
		2/12 mRNA 3'-UTR binding	
	_	3/24 mRNA binding	
	•	1/5 transferase, transferring aldehyde or ketonic groups	
		4/21 solute:cation symporter	
	Γ	5/30 sodium ion transmembrane transporter	
	+	4/10 neurotransmitter transporter	
	∟	1/6 pseudouridine synthase	
		1/5 myosin heavy chain binding	
		1/6 tumor necrosis factor receptor superfamily binding
